1. Introduction of the data underlying the results in reference [1]

Firstly, unpack the compressed file “Fig.7z” to be the folder “Fig”, where all relevant files are placed. Then, by starting the MATLAB software and running the .m files in Table 1, the corresponding figures in reference [1] can be generated. The .mat data files underlying the results in reference [1] are loaded by the .m files to generate the figures.

Table 1

Figure	1(b)	1(c)	2(b1)	2(b2)	2(c)	2(d)
.m file	Fig1_b.m	Fig1_c.m	Fig2_b1.m	Fig2_b2.m	Fig2_c.m	Fig2_d.m
Figure	2(e)	2(f1)	2(f2)	2(g1)	2(g2)	3
.m file	Fig2_e.m	Fig2_f1.m	Fig2_f2.m	Fig2_g1.m	Fig2_g2.m	Fig3.m

2. Citing the data

We kindly request that you cite the following reference [1] in any published work for which you used our provided data here.
